

Boost Your Sales Team's Productivity with Sales iBoT from Perpetuuiti's Plug-and-Play iBoT Store

Create, Change & Update Sales Orders Automatically

What does the Sales iBoT do?

The Sales iBoT from Perpetuuti takes the burden off of the sales people. The iBoT takes care of the standardized tasks of creating and changing sales orders by logging into the SAP sales module.

The Sales iBoT reads inputs from the Web/excel/any other text formats. The cells of the sheet may have mandatory fields to get data from the users. The input updated in the spread sheet is accessed by the iBoT for further data processing. The Sales iBoT then logs into SAP sales module for creating the sales order or changing the sales order. Post the successful update of the data, the confirmation is saved in any format of the output/another excel sheet for local administrator's reference. This iBoT is designed to work for any authorized SAP user to create sales order in SAP using SAP GUI Script.

How is Perpetuuti's Sales iBoT Unique in the Market?

Manual tasks and information silos that slow responsiveness won't cut it with today's customers, who expect a fast and seamless customer experience. By smartly automating manual tasks such as creating and changing sales orders, at a fraction of the human equivalent, Sales iBoT can deliver an immediate cost saving of 60-80% and free up your sales reps. for more value-added tasks and selling.
